

Introducing THE BRAKE STICK by PRECISION CUT

US PATENT PENDING

SIMPLY THE **LIGHTEST, STRONGEST & SAFEST**
BRAKE STICK ON THE MARKET

NEW, LIGHT-WEIGHT TECHNOLOGY creates a single handle tool used to push or pull brake wheels, push brake release levers, turn angle cocks, adjust draw bars, and arm EOTS.

MAKE SAFETY THE PRIORITY

Manufactured from state-of-the-art materials used throughout the Aerospace industry:

- At just over 2 lbs, it is a fraction the weight of a traditional brake tool.
- Durable and stronger than steel.
- Non-slip Kevlar and Carbon Fiber handle
- Unique light-weight, layered Kevlar head
- Strong magnets in handle for ease of storage.
- Durable rubber end and non-spark materials.
- One-piece construction: no pins or latches to snag, jam, or bend.
- **ESSENTIAL** in reducing injuries due to falls, and damage to backs, knees, shoulders and wrists.
- Reduce downtime, workman comp claims, and worker complaints.

Shown above is the Model XL670 with a 5ft handle. Other sizes available.

www.precisioncut.net

It is the safest brake stick you will find, and can be used through an entire workday without fatigue.
